Allocated Blueprint

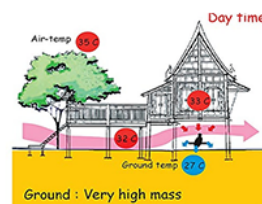

3D Model or Screen Shot

## Suggestion

House

Description: The final 10% is for accommodation and other purposes (paths, levees, haystacks, space for drying compost, sheds, for mushroom culture, animal pens, flower and ornamental plants, and a kitchen garden).

Type: Serene

Roof: Manila roof

Material: Wood

## Tree

Description: The third 30% is used to grow field crops and orchard trees (fruit trees, perennial trees, trees whose wood can be used for general purposes, for firewood, or for construction, field crops, vegetables, and herbs).

Species: Mango    Price: 53.5

Species: rambutan    Price: 43

## Rice Field

Description: The second 30% is used for rice farming.

Species: Thai jasmine rice    Price: 16.3

Species: Pathum rice    Price: 11.1

## Pond

Description: The first 30% is used to dig a pond (where fish can be raised and aquatic plants such as morning glory can be grown). Above the pond chicken coops can be built and along the banks of the pond perennial trees that do not need much water to subsist can also be grown.

Species: Shrimp    Price: 550

Species: Snakehead    Price: 110
